7	Conclusion	
8	Future enhancement of the Project	
	Appendix A Bibliography	

- Requirements of the complete system are clearly defined and understood.
- Major requirements must be defined; however, some functionalities or requested enhancements may evolve with time.
- There is a time to the market constraint.
- A new technology is being used and is being learnt by the development team while working on the project.
- Resources with needed skill set are not available and are planned to be used on contract basis for specific iterations.

5. Reports:

College Website helps businesses to supply the necessary members of staff with timely and accurate financial information. For example, suppose that a company's finance director needs a report of Cash flow to take to a meeting in two hours. Website have built-in reporting modules that enable users to create this type of report by simply filling in a form or clicking a button. However, creating such a report manually would be a time-consuming process.

6. Conclusion:

- Computerized Records give better management of data, through searching and providing search results.
- Increasing the efficiency of college record management.
- Manpower requirements get drastically decreased.
- Providing quick retrieval and manipulating facilities to the users.
- It overcomes most of the problems encountered in the manual system.

7. Future Enhancement:

- The new website will focus on the need of our external constituents and will incorporate the College's new marketing branding and image campaign.
- Responsive web design is the solution to the problem of the increasing number of devices that people use the browse the web.
- The responsive Website solution for mobile browsing has many advantages over the traditional solution.
